

Hybrid CBRF Medication Administration Guide, Standards, and Policy:

This guide, standards, and policies are specific to the Hybrid CBRF Medication Administration course in conjunction with the generic **Virtual Guide, Standards and Policy** that is published.

Hybrid – This course will conduct both virtual and in-person. The majority of the content will be taught virtually, along with the written test over ZOOM and ClassMarker. The skills portion of the course: both the teaching of the skills and testing of skills will be done either 1:1 in person with instructor or via ZOOM with pre-approved proctor. To complete this in-person skills section the two options are:

1. Students will come to attend an approximately 2-hour skills demonstration, practice, and testing classroom lab session with instructor. This will need to be scheduled and coordinated with the instructor within one month of completing the virtual content section of the course. This can be scheduled immediately following the passing of the written testing portion at the end of the virtual instruction with instructor.
2. Student will need to coordinate with a proctor (Administrator at place of work, RN, LPN) that is pre-approved by instructor that they both (student and proctor) can attend the virtual teaching by instructor of

the approximately 2-hour skills demonstration, practice, and verify the testing of the skills. If completed virtually student and/or proctor will need to provide the appropriate and pre-approved demonstration materials for the student to practice and test with. Please contact instructor for further information and guides for this process.

Reminder – Students will not be put on the WI DHS UWGB CBRF registry until they have successfully completed all portions (virtual instruction, written test, and skills demonstration) of this class. If student fail to complete either portion of the class, they will have to retake the class in its entirety.

Effective 06/24/2022
